Just a note to acknowledge the excellent service ENGS Commercial Finance Co. has provided TEC Equipment over the past year. With over 23 locations, it is very important that we get prompt and knowledgeable decisions from our lenders, and we view ENGS as an important vendor for us, and a top competitor in Transportation Finance. The ENGS team members are wonderful to work with. The Sales team always gives the added support our dealership needs to better assist our customers. I have worked with a few ENGS people and all have been very professional, and in particular the strong communication and hard work from the Sales team has helped our dealership close more transactions.

Our experience with the ENGS Credit process has been great – all of the Credit Analysts have been wonderful to work with. They provide me with the rationale for every decision, which helps me to sell the terms to the customer, and they go above and beyond to give us suggestions/options on deals to get the customer approved. Most banks do not offer that type of support and because of that, we have been able to close more deals with ENGS.

I would highly recommend ENGS to any organization. They have been a tremendous asset to our dealership and always provide us with reliable support. We expect our business partners to perform at a certain level of customer satisfaction and ENGS constantly surpasses our expectations.

Thank you for your support.

Sincerely,

*Alexandria Eshenbrenner*
